Foreword

Data plays a vital role in informed decision making in our day to day life. Quantitative Data is used by several data users to measure the performance of any characteristics and accordingly corrective measures are taken. It also helps in structuring strategies for further plan of action.

Data is collected and presented by numerous agencies over a period of time for varied purposes be it academic, business, administrative or otherwise. Data collected over a period of time called "Time Series " is most widely used technique to study trends over a certain period. It is very insightful/handy for policy makers to formulate new policies and in decision making.

The state of Goa attained its statehood on 30th May 1987. To commemorate 35 years of Statehood, the Directorate of Planning, Statistics and Evaluation has brought out a compendium "Goa @ 35 – Data Compendium in Time Series".

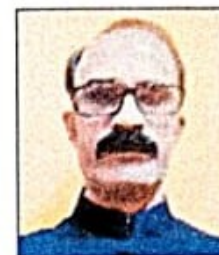

The Directorate has made unfeigned effort to present the progress made by the State over a period of time in quantitative form with an expectation that this compendium may be handful for Economists, Researchers and Government Agencies.

The Directorate of Planning Statistics and Evaluation, has put in great effort to bring out this Compendium.

I am sure that this Compendium will be very useful for wide range of readers interested to know about evolution of Goa after it became a State in 1987.

Preface

India has a long history of collection and the use of various kinds of statistics. Early evidence suggests the application of statistical methods by the States for its advancement. The progress of the State is measured through the statistics collected from various sources at the base level. The Directorate of Planning, Statistics and Evaluation (DPSE) is responsible for the collection of various statistical parameters in the State. As a part of its functions, the DPSE, brings out number of publications through which, data relating to various sectors of the economy are disseminated.

'Goa at 35 – Data Compendium in Time Series' the one of its kind, showcases the progress made by the State over a period of 35 years. A team of dedicated officers/officials of the DPSE have exhibited enormous commitment in compiling this publication.

The DPSE is indebted to data source agencies for their perpetual assistance and hopes that they keep supporting us for our future endeavours. We express our sincere gratitude to all of them.

Every attempt has been made to collect and present the various indicators of development in the most understandable manner. However some data could not be captured even after arduous attempts.

Nevertheless, there is always a scope for improvement and therefore valuable constructive suggestions are always welcomed.
